Indian Ocean Region Direct to Sailor on NSS-12 Cisco 9865 Decoder Settings and Channel Guide

You must access the decoder settings “Tuning/Preset” menu to update your decoder settings. Start from the “Main Menu” and select the “Setup Menu.” Then select “Tuning / Preset” to access the 11 individual settings you need to verify in order to get digital programming. Note that not all settings may have to be changed.

IMPORTANT INFORMATION

The Tuning / Preset menu is a scrolling menu and you will need to scroll down after the “LO Select” field to display the six fields that are offset in the graphical example to the left.

Verify all 11 settings in the Tuning / Preset menu match settings to the left.

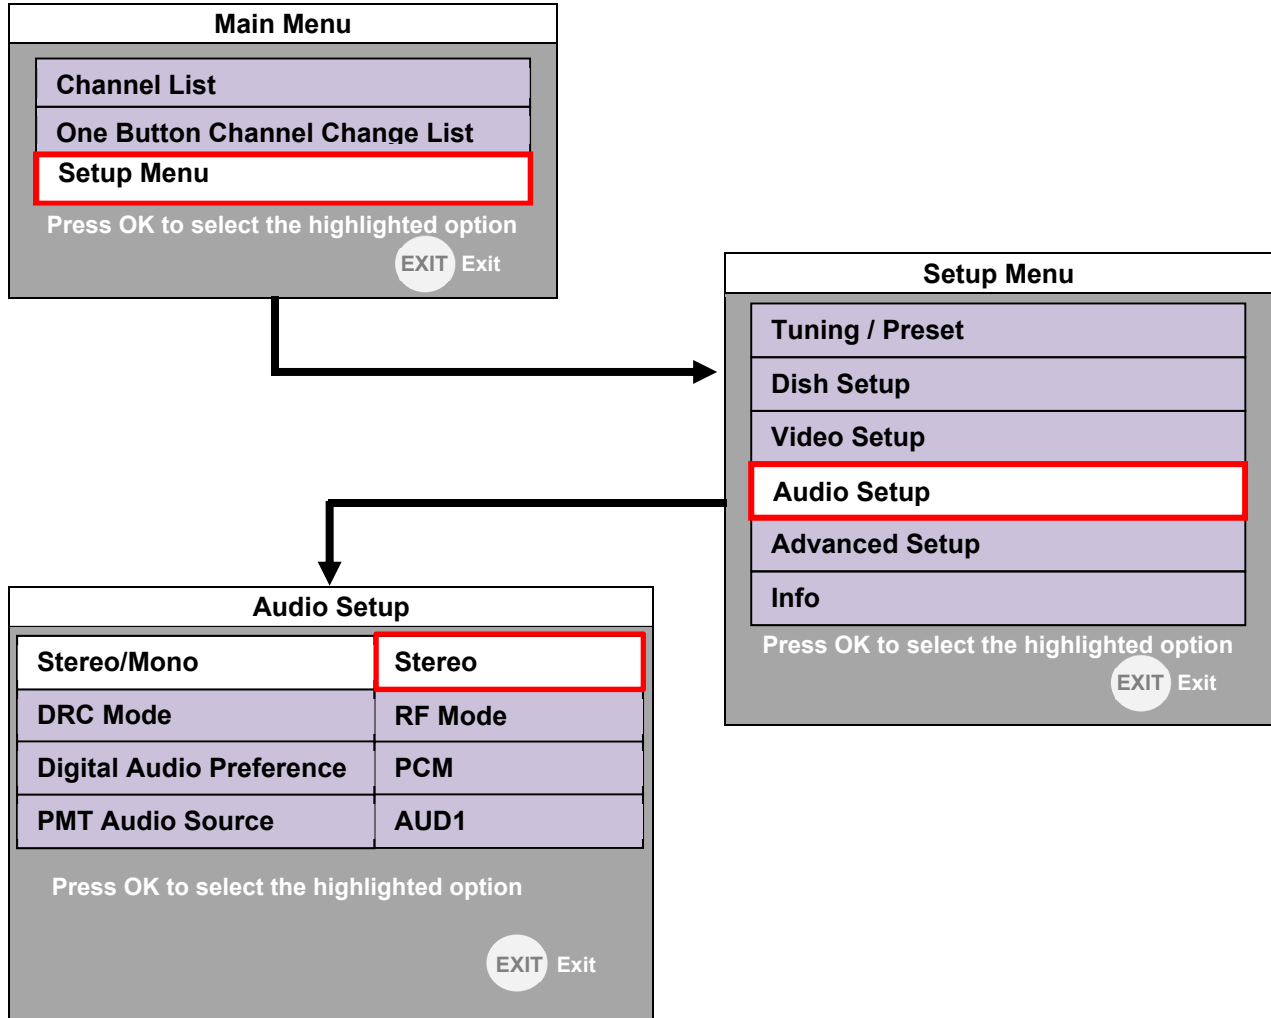

NOTE
Enter the NetID number as 00008

Highlight “Save” and select “Ok” when prompted to save the decoder settings.
